

*With this small expansion of 8 fish, your reef harbors even more life!*

*Can you direct your fish to the corals whose patterns you are about to score?*

## SETUP

Set the game up as usual. Then each player takes **2 fish** and places them next to his player board.

Any excess fish are returned to the box.

## PLAYING THE GAME

The game is played as usual. However, at the very end of **each** of your turns (after you have finished performing action **A** or **B** completely), you **may** move **one** of your fish to an orthogonally adjacent space of your player board (not diagonally).

- If that fish is still next to your player board, it can enter your board on any edge space.
- If there is a coral piece or stack (of any height) on the space that you move to, put the fish on top of it.
- Your two fish can never be on the same space.

## CHANGES TO ACTION B

When you play a card, the fish on your player board may affect you in the following way:

### DURING STEP 1

When you place your coral pieces, you are not allowed to place them onto any space/stack with a fish on top.

### DURING STEP 2

When scoring a pattern, you get 1 additional point for each fish that sits on any top piece that is part of that pattern. (So you can get at most 2 additional points if each of your 2 fish sits on a top piece of the same or two separate completions of the scored pattern.)

#### *Example:*

*Eva plays this card.  
After she has placed the yellow  
and purple pieces (which cannot  
go where her fishes are),  
she scores the pattern.*

*Within her reef, she has completed the pattern twice, giving her 8 points.*

*Also, since both of her fish are on top pieces that are part of that scored pattern, she gets 2 additional points. If only one of them had been on a top piece of the scored pattern, she would have received 1 additional point.*

*Afterwards, she may move 1 fish to an adjacent space.*

**Notes:**

- When you score this type of pattern,  it does not matter whether a fish sits on the center piece or on any surrounding piece to give you its additional point.
- For each hand card whose pattern you score at the end of the game, your fish count as usual. (This also applies if your 2 fish sit on two separate completions of a scored pattern: so you get the additional 2 points, even though you earn the point value of the pattern only once.)
